

Tonka ORGANIX™

ORGANIX™ is the most cost-effective, customized and user-friendly solution to the complex challenge of organics removal

- Superior TOC, DOC, and color removal using organic selective ion exchange resin
- Guaranteed water quality
- System responsibility from an experienced manufacturer
- Easy integration into existing facilities – both ground and surface water treatment
- Trouble-free operation – no moving parts or complex hydraulic balancing
- Proven results – successful track record with numerous installations
- Cost-effective solutions – lowest cost of treatment

Tonka has over 50 years of experience in manufacturing customized treatment solutions for cities and towns across the United States.

Tap into Tonka's Expertise

We have the knowledge and experience for your project

- Conventional and proven process
- In-vessel technology
- Efficient footprint – easy to install and maintain
- Inherent system redundancy
- Simple, easy-to-use controls
- Intermittent off-line resin regeneration
- Robust system – tolerates influent hydraulic and TOC fluctuations
- Guarantee against resin loss or attrition

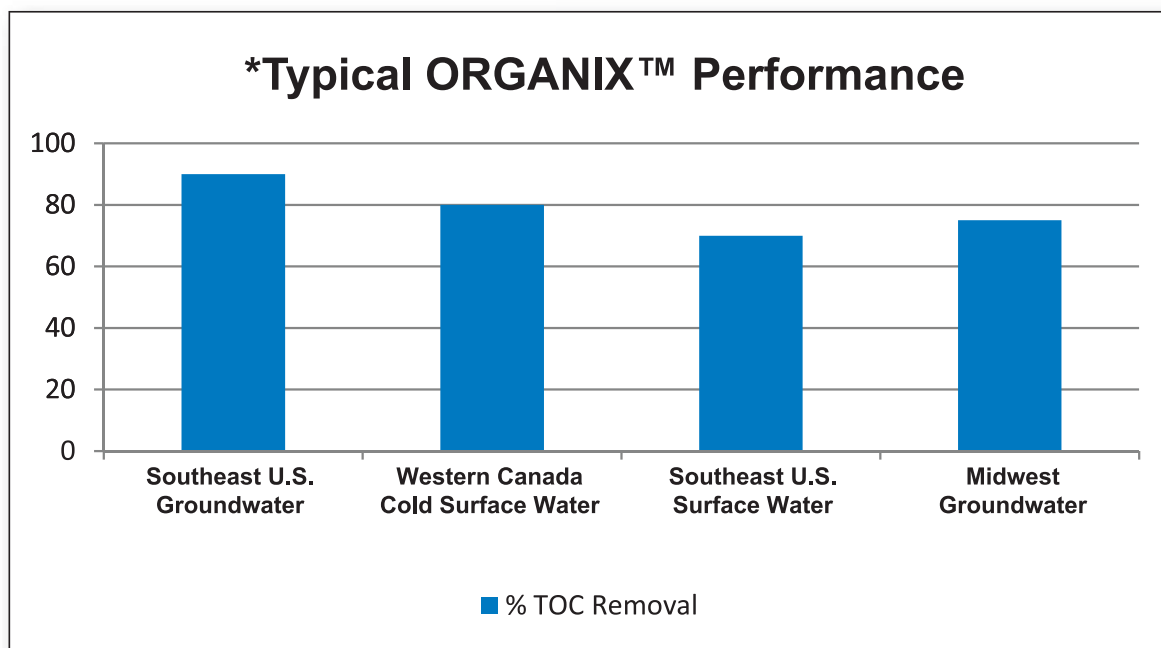

4 MGD ORGANIX™ Installation

Fast, low-cost
pilots available

Tonka ORGANIX™ can:

- Operate intermittently or continuously
- Provide up to 90% removal of TOC*
- Be incorporated as a “slip stream” treatment
- Handle a wide range of organic compounds
- Eliminate THM and HAA formation potential prior to disinfection
- Be fully automated and SCADA compatible
- Be adapted for seasonal operation as needed

Tonka ORGANIX™ is a pressurized, enclosed process

- No intermediate pumping required – stays pressurized
- Not dependent on flocculators, gear reducers, mixers or other mechanical devices
- Avoids exposure to atmosphere and sunlight which promote biological growth
- No downstream equipment (screens, filters) required for resin capture
- Minimal waste stream
