

OPTACELL PLUS™

ISOLATED CELL HORIZONTAL PRESSURE FILTER

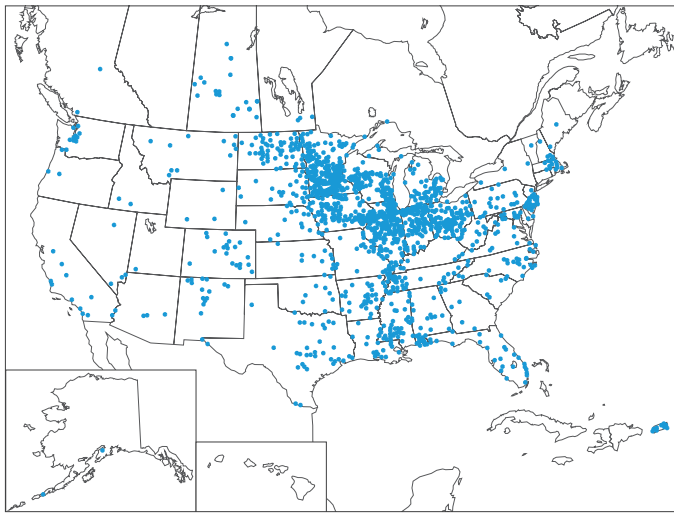

TREATMENT

- Arsenic
- Iron and manganese
- Radium
- Organics
- Membrane pre-treatment
- Turbidity

Customized pressure filters that meet your treatment needs

Tonka Water, a U.S. Water Brand's customized solutions

Tonka Water's OptaCell Plus™ isolated cell horizontal pressure filters accommodate plants needing a small footprint and operational flexibility. Our OptaCell Plus™ design gives users the capability to remove a treatment cell from service while other cells remain in operation. This functionality enhances plant efficiency, saves scheduled down time and provides unique flexibility for plant operators. These versatile filters can be constructed as end or side piped, in 8, 10 or 12 ft diameters, and constructed in single or multiple vessel configurations. Our customizable filters are long lasting and can include a range of features not found anywhere but with Tonka Water.

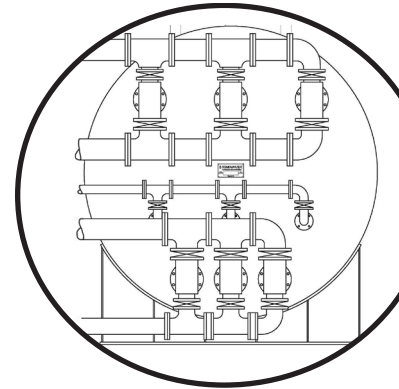

Tonka Water Guarantee

Tonka Water provides the best custom manufactured water treatment systems in the industry. Our people will deliver excellent service and support for your project from conceptual and cost-effective design, to construction and commissioning; and throughout the system warranty and operational life of the project.

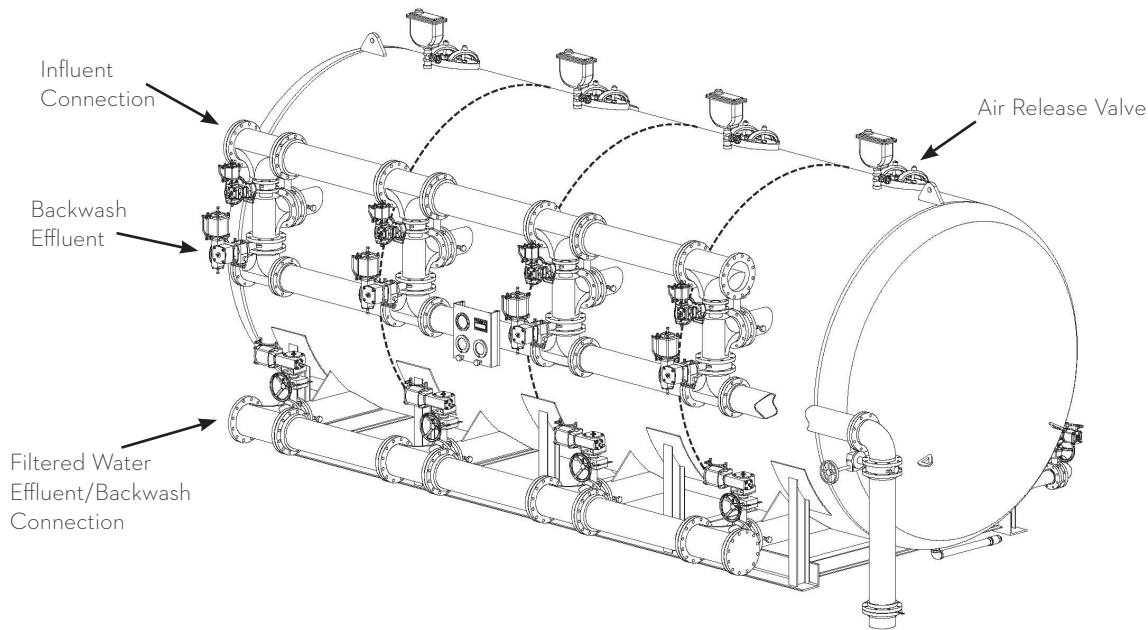

Thousands of quality water treatment installations since 1956.

OptaCell Plus™ System Advantages

- ASME Code constructed, certified and U-Stamped
- Incorporates Simul-Wash™ for backwash efficiency
