

# OPTACELL™

## HORIZONTAL PRESSURE FILTERS

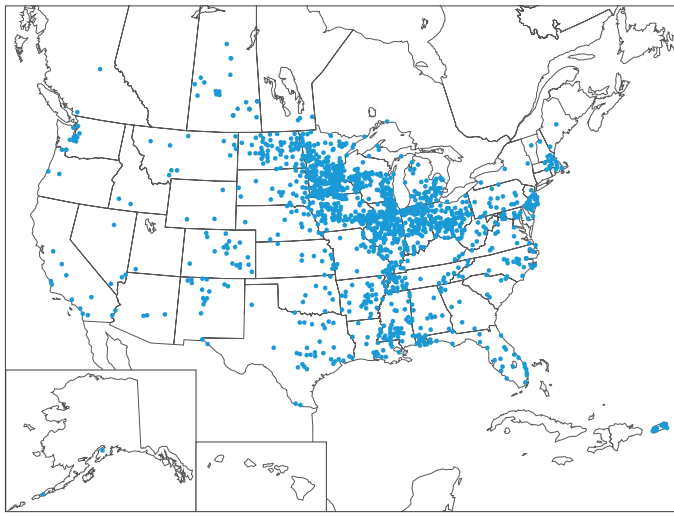

### TREATMENT

- Arsenic
- Iron and manganese
- Radium
- Organics
- Membrane pre-treatment
- Turbidity

Pressure filters that meet your treatment needs

### **Tonka Water, a U.S. Water Brand customizes filters in many ways:**

Horizontal pressure filters are one of the most common configurations in the water treatment industry. Our OptaCell™ pressure filters are incredibly versatile; they can be constructed from 8 to 12 feet in diameter, end or side piped, and constructed in single or multiple vessel configurations. The Tonka Water OptaCell Plus™ isolated cell feature is a great option for plants with a small footprint and affords operational flexibility. The tanks are long lasting, and can be customized to include a range of systems including Simul-Wash™, airwash, and various underdrain systems. OptaCell™ filters are constructed to meet the highest quality standard, and bear the ASME stamp assuring accordance with the latest code.

## Tonka Water Guarantee

Tonka Water provides the best custom manufactured water treatment systems in the industry. Our people will deliver excellent service and support for your project from conceptual and cost-effective design, to construction and commissioning; and throughout the system warranty and operational life of the project.

*Thousands of quality water treatment installations since 1956.*

## OptaCell™ System Advantages

- ASME Code constructed, certified and U-Stamped
- Versatility in systems: Simul-Wash™, water only, or air followed by water backwash
- Media selections: many options available
- Allows for future expansion
- Operationally efficient and easy to maintain
