

TONKA WATER, AT A GLANCE

Company Profile

Tonka Water, a U.S. Water Brand, has been the leader in customized water treatment solutions since 1956. We have installed more than 2,400 individually designed water treatment systems across North America. In 2017, Tonka Water was acquired by U.S. Water Services, Inc. (U.S. Water), an ALLETE Company (NYSE:ALE), headquartered in St. Michael, MN. U.S. Water was founded in 1997 by three individuals with a unified mission: to be universally recognized as the most innovative and flexible provider in the market place by focusing on safe, economical and environmentally sound solutions. U.S. Water provides integrated water solutions combining chemicals, equipment, engineering and service to reduce water and energy use and improve efficiency.

Tonka Water has a long and successful history of delivering quality water treatment systems for customers throughout the world. Our people are known, trusted and respected for their hard work and water treatment knowledge. Our goal is to start early, with project feasibility and conceptual design, onto detailed process design, manufacturing, commissioning, installation and beyond. With Tonka Water, you get top-quality water throughout the life of your facility.

Tonka Water's range of experience since 1956 has led to a wide variety of treatment applications, including:

- Surface water
- Groundwater
- Water reuse/reclamation/re-injection
- Industrial process water
- Remediation
- Advanced wastewater treatment

programs

“ Focusing on the **Future of Water**, we have a passion for developing and delivering innovative solutions that leave the world a **better place with better water.** ”

Exceptional Expertise

Our people are water treatment process experts and they know the complexities of the water industry. Our work starts with water quality analysis and treatment goals, and finishes with cost-effective installations that incorporate the best available technology.

Commitment to Quality

Tonka Water's commitment to quality starts early with understanding our customers' requirements and meeting their unique application needs. Quality is infused throughout our internal processes; from project planning, fabrication and inspection, to our experienced on-site field service professionals, who successfully complete each project.

Customized Solutions that Work

Tonka Water's broad and diverse product line allows consulting engineers and owners to select the right cost-effective water treatment system for any water application. Since water quality is always site-specific, each system we manufacture is customized to meet the specific needs of the project.

Innovation

Tonka Water relentlessly works to identify new products and processes to address the changing needs of our customers. Our vast array of product lines is proof that we continue to meet the ever-growing demands of the water industry. We continue to be innovative leaders to the world of water treatment, bringing new, improved and cost-effective technologies.
